PROJECT

MyPortofolio

- A simple portfolio website built using HTML, CSS, and JavaScript, featuring various functionalities.

ToDoit

- A to-do list application project built using HTML, CSS, and JavaScript. The primary goal is to learn DOM manipulation, event handling, and dynamic element management. It includes features to add new tasks via an input field, delete specific tasks using a delete button, and display a "task not found" message when the list is empty.

MiniShop

- A website serving as an online marketplace accessible from anywhere, built on Nuxt.js using TypeScript.
